BETHANY COLLEGE 02/03

Course Descriptions

ADST—Addiction Studies

ADST 4103 Introduction to Addictive Behavior Studies

Historical and contemporary issues related to understanding and responding to substance abuse problems will be covered in this introductory course. (Prerequisite: Enrollment in CPAC or instructor's consent.)

ADST 4113 Physiology and Pharmacology of Addiction

Examines the physiological effects and biopharmaceutics of alcohol and other drugs, especially as to tolerance, withdrawal and addiction patterns. HIV, AIDS, STDs and addiction related pathology are also covered. (Prerequisite: Enrollment in CPAC or instructor's consent.)

ADST 4123 Counseling of Addictive Behavior I

An introductory course focusing on counseling issues, skills and knowledge, progressing to applied counseling skills for substance abuse and addiction issues. (Prerequisite: Enrollment in CPAC or instructor's consent.)

ADST 4133 Sociology of Addictive Behavior

A study of social issues and patterns related to substance abuse, with particular focus on interaction between co-laterals and the dependent person. Family theory, intervention and counseling will be investigated. (Prerequisite: Enrollment in CPAC or instructor's consent.)

ADST 4203 Treatment of Addictive Behavior

A study of the patterns of addiction for various sub-groupings of society as well as society as a whole. This course is a survey of current models of prevention and intervention in substance abuse. It is designed to provide a practical understanding of how to help a client arrive at sobriety in both religious and secular programs. (Prerequisite: Enrollment in CPAC or instructor's consent.)

ADST 4213 Professional Treatment Skills

A survey of law, documentation, protocol, ethics, recordkeeping and management issues related to program development and management. (Prerequisite: Enrollment in CPAC or instructor's consent.)

ADST 4223 Human Services

Case management, program development and management, as well as clinical supervision will be studied along with specific case presentation skills such as screening, assessment, crisis intervention and referral. (Prerequisite: Enrollment in CPAC or instructor's consent.)

ADST 4233 Counseling of Addictive Behavior II

An advanced addiction counseling course utilizing role-play and lecture to teach individual, group and family counseling skills for addictive behaviors. (Prerequisite: Enrollment in CPAC or instructor's consent.)

ADST 4913 Supervised Field Work I

Hands on volunteer work in an agency setting with supervision by both agency personnel and faculty. First Semester course. (Prerequisite: Enrollment in CPAC or instructor's consent.)

ADST 4923 Supervised Field Work II

Hands on volunteer work in an agency setting with supervision by both agency personnel and faculty. Second Semester course. (Prerequisite: Enrollment in CPAC or instructor's consent.)

ADST Special Courses

Special courses are offered periodically. See page 130 of the catalog for descriptions of special courses.

ANTH—Anthropology

ANTH 1103 Cultural Anthropology

A survey of the field and major premises of cultural anthropology, including organization and dynamics of human cultures, marriage and family systems, thought processes, language, worldview, religion, social change and intercultural relations.

ANTH 1203 Voices & Visions:

Intercultural Values and Adaptations in Education

An analysis and application of intercultural learning as people from diverse backgrounds immigrate to the United States for educational purposes, with special focus on the different expectations of academia at the college level. Approaches to thinking, speaking and writing will be evaluated, with students sharing their own cultural experiences in learning and developing a broader understanding of current academic expectations for success. Oral presentations, library and Internet research, written analysis, and formal research paper required.

ANTH 1303 Cultural and Ethnic Diversity

Analysis of subcultures in the United States including contact, conflict, prejudice, discrimination and the process of cultural change. Oral presentations required.

ANTH 2103 Intercultural Communications

Study of value systems of other cultures; the tools needed for effective communication with them; and the consideration of changes resulting from cross-cultural contacts including missions activities. Oral presentations required.

ANTH 2113 Religion and Culture

Examination of the forms and functions of the religious urge in different cultures, the so-called "primitive" religions and actual folk practices —often in sharp contrast to official dogma associated with the great religions including Christianity.

ANTH 3103 Culture and Personality

Anthropological insights into the structuring of individual human personality by cultural factors. Examines child-rearing practices, social/national character, values, mental health and deviance, and psycho-cultural change. Moderate writing requirement. (Prerequisites: PSYC 1103 General Psychology and ANTH 1103 Cultural Anthropology).

ANTH 3703 Linguistics

This course presents a study of language in a social/cultural context including morphology (the structure of words), grammar and semantics (the structure of meaning in communication), and phonetics and phonology (sound systems in language). Particular focus is placed on the structure of English with comparisons to other language systems. Skills acquired in this course may be applied to language acquisition and teaching English as a second language. Note: Candidates taking this course to apply toward the subject matter competency requirement for a CTC approved major, or a California teaching credential requirement must receive a grade of C or higher.

ANTH 4103 Cultural Change and World Problems

Survey of the dynamics of culture change and the role of change agents, including pastors, missionaries, commercial agents and civil authorities. Selected current world problems and crisis situations are examined in the light of culture change processes. Heavy writing requirements, oral presentation required.

ANTH Special Courses

Special courses are offered periodically. See page 130 of the catalog for descriptions of special courses.

BIBL—Bible

BIBL 1103 Old Testament Foundations

An introductory course designed to provide students with a basic knowledge of representative contents of the Old Testament, to equip them to understand and interpret its message, and to prepare them for advanced biblical studies. The historical context, geographical setting, literary types, theological themes, textual development, and canonical formation of the Old Testament are investigated. An effective interpretive method is presented. Significant developments in Old Testament scholarship are discussed. (Prerequisite for all other Old Testament courses.)

Course Descriptions

BIBL 2203 The Life and Teachings of Jesus

ANTH 2113 Religion and Culture

Examination of the forms and functions of the religious urge in different cultures, the so-called "primitive" religions and actual folk practices—often in sharp contrast to official dogma associated with the great religions including Christianity.

ANTH 3103 Culture and Personality

Anthropological insights into the structuring of individual human personality by cultural factors. Examines child-rearing practices, social/national character, values, mental health and deviance, and psycho-cultural change. Moderate writing requirement. (Prerequisites: PSYC 1103 General Psychology and ANTH 1103 Cultural Anthropology).

ANTH 3703 Linguistics

This course presents a study of language in a social/cultural context including morphology (the structure of words), grammar and semantics (the structure of meaning in communication), and phonetics and phonology (sound systems in language). Particular focus is placed on the structure of English with comparisons to other language systems. Skills acquired in this course may be applied to language acquisition and teaching English as a second language. Note: Candidates taking this course to apply toward the subject matter competency requirement for a CTC approved major, or a California teaching credential requirement must receive a grade of C or higher.

ANTH—Anthropology

ANTH 1103 Cultural Anthropology

A survey of the field and major premises of cultural anthropology, including organization and dynamics of human cultures, marriage and family systems, thought processes, language, worldview, religion, social change and intercultural relations.

ANTH 1203 Voices & Visions: Intercultural Values and Adaptations in Education

An analysis and application of intercultural learning as people from diverse backgrounds immigrate to the United States for educational purposes, with special focus on the different expectations of academia at the college level. Approaches to thinking, speaking and writing will be evaluated, with students sharing their own cultural experiences in learning and developing a broader understanding of current academic expectations for success. Oral presentations, library and Internet research paper required.

ANTH 1303 Cultural and Ethnic Diversity

A study of the patterns of addiction for various sub-groups of society as well as society as a whole. This course is a survey of current models of prevention and intervention in substance abuse. It is designed to provide a practical understanding of how to help a client arrive at sobriety in both religious and secular programs. (Prerequisite: Enrollment in CPAC or instructor's consent.)

ANTH 2103 Intercultural Communications

Study of value systems of other cultures; the tools needed for effective communication with them; and the consideration of changes resulting from cross-cultural contacts including missions activities. Oral presentations required.

BIBL 3503 Studies in the Major Prophets

An introduction to prophecy and prophetism in the ancient Near East and the Old Testament is followed by an overview of the historical setting, literary structure, and theological contributions of each of the Major Prophets: Isaiah, Jeremiah, and Ezekiel. Selected portions of one or more books are then investigated according to instructor and/or student interest. The value of this material for contemporary ministry is discussed.

BIBL 3513 Studies in the Minor Prophets

The development and nature of Old Testament prophecy are discussed to provide perspective on the historical context, literary structure, distinctive messages, and primary purpose of each of the Minor Prophets. Selected books are examined in detail. The significance of the Book of the Twelve as a whole is also considered. The impact of this material on the New Testament and its potential use in contemporary settings are discussed.

BIBL 3213 Paul and Spiritual Development

A study of spiritual development using the life and ministry of the Apostle Paul as a model. Special attention will be given to understanding the stages of spiritual development of Paul and the implications of Church Leaders. (Prerequisite: BIBL 1203 New Testament and THEO 2113 Introduction to Spiritual Formation.)

BIBL 3313 Prison Epistles

This course includes Paul's prison epistles, consisting of Colossians, Philippians, Ephesians, and Philemon. These four Pauline works are given careful and thorough investigation.

BIBL 3403 Studies in the Pentateuch

An overview of the nature, purpose, content, background, and structure of the first five books of the Bible is followed by detailed investigations of selected passages. Proposals concerning composition, unity, dating, and authorship are addressed. Suggestions for using this material in contemporary ministry are discussed.

BIBL 3413 Studies in Old Testament Narrative

An investigation of the nature of Old Testament narrative precedes a survey of the historical contexts and contents of the books of Joshua through Esther. Selected portions of these books are then examined in detail with special focus on literary features, theological emphases, and relevance for today.

BIBL 1103 Old Testament

Four frameworks will be utilized in the study of the Old Testament, in order to provide a sound grasp of its message, historical, literary, canonical, and theological. (Prerequisite for all other Old Testament courses)

BIBL 1203 New Testament

Four frameworks will be utilized in the study of the New Testament in order to provide a sound grasp of its message: socio-historical, literary, canonical, and theological. (Prerequisite for all other New Testament courses)

BIBL 4313 Hebrews and General Epistles

Hebrews consists of a detailed study of the fulfillment of Old Testament types and institutions in the person and work of Christ. The distinctive message and content of selected general epistles are carefully considered, including James and the two epistles of Peter.

BIBL 4413 Studies in the Psalms

An analysis of the nature of Hebrew poetry serves as background to an investigation of the book of Psalms. Significant introductory issues, scholarly developments, theological themes, literary types, and interpretational method are surveyed. Representative psalms are examined in detail. Suggestions for incorporating psalms into contemporary worship and personal devotion are offered.

BIBL 4423 Studies in Old Testament Wisdom

The international flavor, literary techniques, and predominant themes of Old Testament wisdom literature are discussed. The development of the "wise man/woman" in Israeli society are addressed. The books of Proverbs, Job, Ecclesiastes, and Song of Songs are surveyed. Selected passages and/or books are analyzed in detail. Interpretational techniques is discussed. The prevalence of wisdom literature in the Intertestamental Period, its impact on the New Testament, and its use in the contemporary church are examined.

BIBL 4703 Apocalyptic Literature

This is a study of Daniel and Revelation. After a brief exposure to this literary genre both inside and outside the Bible, an analytical study of Daniel is made in connection with its historic setting and prophetic prediction. The prophecies of the Revelation are studied in detail and comparisons are made with predictions of Daniel.

BIBL Special Courses

Special courses are offered periodically. See page 122 of the catalog for descriptions of special courses.

BUSI—Business

Discusses the development of an integrated concept of principles of management which have general applicability to all types of organizations. A study of principles involved in the functions of planning, organizing, staffing, directing and controlling an organization. An introduction to basic management philosophy and the decision-making process.

BUSI 1113 Introduction to Business

A basic survey of the scope, function, and organization of contemporary business with an emphasis on the careers available within the world of business. This course will be of interest to both business majors and other students.

BIBL 4213 Acts

A comprehensive study of the origin and nature of Apostolic Christianity, as a Jewish community, through its early development beyond this Jewish background. Special attention will be given to the role of the Holy Spirit in this process.

BUSI 1203 Computer Applications of Business I	The theory and practice of the major uses of computers in business. Particular emphasis on hands-on experience with word processing, spreadsheets, database management, and presentation graphics. Discussion of the evaluative process in selecting both software, hardware, and peripheral products.	BUSI 3103 Legal Aspects of the Business Process(Business Law I) Prerequisites-Financial Management of Organizations and Organizational Behavior and Management. An examination of the law and its historical development, courts and procedures, and basic legal principles as they relate primarily to business ethics, business crimes, product and service liability, warranties, business organization and operation, insurance, property contracts, commercial paper, and sales of real and personal property. Methods Prerequisite: The college general education math requirement. MATH 2403. Provides the student with experience in the mathematical applications unique to the business worlds of retailing, banking, and finance.	BUSI 2123 Quantitative Business The theory and practice of the major uses of computers in business. Particular emphasis on hands-on experience with word processing, spreadsheets, database management, and presentation graphics. Discussion of the evaluative process in selecting both software, hardware, and peripheral products.
BUSI 2103 Macroeconomics An introduction to the principles of economic analysis, economic institutions, and the issues of public policy. Includes analysis of the national economy, money and credit, income, employment, prices, and monetary and fiscal policies.	BUSI 2113 Microeconomics An introduction to the economics of private enterprise and resource allocation, including the theories of supply and demand, elasticity, factors of production, price and output determination under various market structures, market equilibrium. Also includes discussion of wages, rent, interest, profits, and income together with their functions in the market system.	BUSI 2123 Personal Financial Management A discussion of individual and family management of budgets, bank accounts, loans, credit, insurance, real estate, investments, and retirement. Provides students with an integrated perspective to managing one's personal financial affairs. This course will be of interest to both business majors and other students.	BUSI 2203 Principles of Accounting I An introduction to the basic assumptions which underlie contemporary accounting with emphasis on the fundamental procedures used in preparing journals, ledgers, and financial statements. Discusses the various uses of accounting data in management and decision-making.
BUSI 2213 Principles of Accounting II Prerequisites-Quantitative Business Methods and Principles of Accounting I A study of accounting principles pertaining to partnerships and corporations. Payroll and some tax issues will also be discussed. Introduction to manufacturing and cost accounting is included.	BUSI 3303 Marketing Management Prerequisites-Macroeconomics and Principles of Management. An introduction to the marketing fundamentals involved in the marketing process, including the functions, institutions, channels of distribution for goods and services from manufacturer to consumer. Includes discussion of the behavior of firms in the competitive economy as related to the retail and wholesale markets, pricing models, and government regulation.	BUSI 3333 Statistics Prerequisites-Math 2403 and Quantitative Business Methods. This course is an introduction to techniques for the treatment of data in the social and behavioral sciences, business, and education. Among the topics discussed are frequency distributions, percentiles, measures of central tendency, variability, the normal curve function and probability, simple correlation analyses, and some application of sampling theory. Also discussed is the use of the t-statistic as well as an introduction to Analysis of Variance models.	BUSI 4103 Organizational Behavior and Management Prerequisites-Introduction to Business and Principles of Management An examination of organizational behavior, principles of leadership and their application to group settings. Emphasis will be placed on organization and work design, goal setting, reward systems, managing change, theories of motivation, role of power, and decision-making.
BUSI 4123 International Business Prerequisites-All lower division business core requirements. Marketing Management, Financial Management of Organizations. This course provides an introduction to the complexities of the globalization issues. Attention will be directed to multinational marketing and the issues of cross-cultural communication. International finance and international economics will be discussed. The complexities created by the significant differences in national laws and customs will be explored.	BUSI 4203 Management Information Systems Prerequisites-All lower division core requirements and Computer Applications of Business II. A study of business systems and the role of technology in contemporary business organizations. Topics include timeliness of information processing and dissemination, the obsolescence of technological equipment and its impact on businesses, the use of technology for strategic planning and implementation.	BUSI 4213 Financial Management of Non-Profit Organizations Prerequisite-Permission of instructor. This course is designed for both religion majors and business majors to gain a comprehensive theoretical foundation underlying the appropriate church/non-profit organization financial administration. Simultaneously, emphasis is given in providing practical, hands-on information and procedures to be integrated with the theoretical foundation. There exists an assumption in this course that it is God's business being discussed and therefore requires excellence in performance and the very highest integrity.	BUSI 4223 Quantitative Analysis Prerequisites-All lower division core requirements, Computer Applications of Business II, and Statistics. The application of quantitative methods to enhance decision-making. Emphasis is placed on decision theory, advanced linear programming, game theory, PERT, forecasting, queuing, simulation, and Markov analysis.

BUSI 4243 Financial Management of Organizations Prerequisites-Quantitative Business Methods, Principles of Accounting I and II, and Personal Financial Management. A study of basic principles and theories of business finance, including cash flow analysis, working capital management, capital budgeting, investment activities, credit management, mergers, acquisitions, reorganizations, and liquidations. Includes discussion of financial principles and practices related to business corporations, identifying methods, instruments, control factors in raising, administering, distributing funds and the sources and uses of financial information.	CDVL 1103 Introduction to Early Childhood Learning This course provides an overview of careers which involve working with young children. Students are exposed to current issues and trends in early childhood education as compared to the historical progression. Major leaders in the field of early education are presented as they relate to specific issues. Further, students will examine each developmental aspect of the growing child as related to the learning environment. Diversity and intercultural awareness are integral to course content.	CDVL 1203 Program and Curriculum Development These courses fulfill the requirements with the state of California for the Child Development Associate Certification.	CDVL 3203 Administration and Supervision of Early Childhood Programs This course provides an overview of administrative and supervisory programs for young children. Such areas as development of philosophy and curriculum along with establishing the appropriate environments are discussed. Students also are guided to issues relating to staff development, financial management effectively with parents, financial management and the day-to-day management of child care programs. California state regulation for child care programs, Title 22, is presented and addressed throughout the course of the semester.
BUSI 4303 Legal and Ethical Environment of Business (Business Law II) Prerequisite-Legal Aspects of the Business Process. This course explores the historical, philosophical, and religious bases of legal systems, the ethical posture of law as related to the moral dimensions of an economic complex, and the policies and implementation procedures of federal, state, and local regulatory agencies.	BUSI 4403 Human Resource Management This course is designed to assist the student in understanding the principles, policies, and practices related to procurement, development, maintenance, and utilization of human resources in achieving organizational goals.	CDVL 1312 Health and Nutrition This course presents both the science of proper nutrition and the application of nutritional principles to children. Students are provided the opportunity to evaluate nutritional and health practices for children from birth through adolescence. Cross-cultural health care and safety issues for children, related to societal structures, are integrated throughout course content.) May be taken concurrently with CDVL 1321.	CDVL 3213 Sensorial Education This course in sensorial education covers the theory and use of the five senses as an approach to educating children. These activities are used with young children to develop and design sensory perception, language, movement, independence and social development and are easily applied to cross cultural settings. Specifics such as the use of sensory and practical life materials, are presented. A basic component of this course is the Montessori method. This is a hands-on class where by students will actively participate in the development of learning activities. Lab fee required.
BUSI 3113 Managerial Accounting Prerequisites-A study of the principles of cost accounting, cost determination, procedures, control and analysis of cost, and managerial problems which depend upon cost accounting for adequate solutions. Specifically preparing students to carry out three essential functions in organizations: 1) Planning operations, 2) controlling activities, 3) decision-making.	BUSI 3203 Computer Applications of Business II Prerequisite-Computer Applications of Business I Emphasizes continuing hands-on experience with word-processing, spreadsheets, database management, and presentation graphics. Introduction to network issues, internet activities, and integration of communication and information technologies as specifically applicable to the business community.	BUSI 4903 Business Internship I Prerequisites-All lower division business core requirements, may be taking some upper division core requirements concurrently. Must have permission of instructor. This is actual work experience in a business firm providing an opportunity to integrate classroom learning in practical application under direct supervision. The work assignment is in the area of the student's major interest. Students are required to do outside reading.	CDVL 3973 Supervised Field Work This course may be taken in segments of 3 units each in a given semester and requires a minimum of 7 hours per week (morning only) working in the ECLC laboratory school. The student will work under the supervision of the preschool director as well as the Child Development program director. Throughout the assignment, the student will experience first hand the task of the teaching in early childhood settings. Students will be involved in the total planning and implementation of the children's programs and will be afforded the opportunity to learn from experienced teachers. (Prerequisite: CDVL 1103 Introduction to Child Development, CDVL 1203 Program and Curriculum Development, CDVL 1413 Child Parent and Community Relations and PSYC 2103 Child Growth and Development.) Lab fee required. This course may be repeated once for credit.
BUSI 4203 Management Information Systems Prerequisites-All lower division core requirements and Computer Applications of Business II. A study of business systems and the role of technology in contemporary business organizations. Topics include timeliness of information processing and dissemination, the obsolescence of technological equipment and its impact on businesses, the use of technology for strategic planning and implementation.	BUSI 4213 Financial Management of Non-Profit Organizations Prerequisite-Permission of instructor. This course is designed for both religion majors and business majors to gain a comprehensive theoretical foundation underlying the appropriate church/non-profit organization financial administration. Simultaneously, emphasis is given in providing practical, hands-on information and procedures to be integrated with the theoretical foundation. There exists an assumption in this course that it is God's business being discussed and therefore requires excellence in performance and the very highest integrity.	BUSI 4903 Business Internship II The job obtained for Business Internship I may be continued for a second semester for additional credit with the permission of the instructor and mutual consent of the employer. An entirely different job can be used for Business Internship II with the same requirements as are found in Business Internship I.	CDVL 1413 Child, Parent, and Community Relations Involvement with parents and the community is key to the successful implementation of any early childhood program. This course presents practical methods for working effectively with parents as well as techniques for involving them in the educational process. Specifics of developing parent education programs, conferencing, and effective communications are each developed throughout the semester.

CDVL 4806 Domestic Student Teaching and Internship	<p>After the completion of the core child development courses, including supervised field work, the student will be placed in an early childhood program. This experience lasts from 8 to 10 weeks. The student will assist in the teaching process including the development of curriculum and activities. Further, the student will learn about the children and families and how to meet their educational and spiritual needs.</p>	<p>CHST 2123 Pentecostal Doctrine and History A course which presents Pentecostalism through the perspective of doctrine and history, with a special focus on the Assemblies of God. Special attention is given to unique contributions Pentecostalism has made to Christianity. Students will examine current trends, challenges, opportunities, issues and growth patterns within Pentecostalism. (Prerequisite: CHST 1103 Church History.)</p>	<p>CDVL 4856 International Student Teaching and Internship After the completion of the core child development courses, including supervised field work, the student will be placed at an overseas school. This experience lasts from 8 to 10 weeks. The student will assist in the teaching process, including the development of curriculum and activities. Further, the student should learn about the children and families in that specific culture and how to meet their educational and spiritual needs.</p>	<p>CHST 2213 History of Pentecostal Spiritualities The class will explore the rich variety of the burgeoning spiritual tradition commonly called the 20th century Pentecostal (and/or Charismatic) movement. It will examine the traditions of spirituality as lived by (experienced and expressed) individuals and communities of faith. Our investigation will focus upon the historical expressions and development within the movement as well as contemporary presentations of Pentecostal/Charismatic spirituality.</p>	<p>CHST 2223 History of Protestant Spiritualities This class will examine the 16th century roots of the Protestant spiritualities. Tracing the development of the four main Protestant European forms (Lutheran, Reformed, Anabaptist, Anglican), we will outline the development of other protestant spiritualities as they emerge in the succeeding centuries. Special attention will be given to characteristics of protestant spiritualities (e.g., Puritan, Quaker, Baptist, Methodist, Frontier/Revivalist, Pentecostal) within North America as they (re)formed and matured.</p>	<p>CHST 3103 Church History The history of the Christian Church will be studied according to the four major periods of the Early Church, Medieval Church, Modern Church, and Contemporary Church, with consideration of the expansion, movements and leaders, councils, creeds, doctrines, societal dynamics, within each period. (Prerequisite for all other Church History courses)</p>	<p>CHST 2103 History of Christian Spiritualities I (2nd-12th centuries) Building on basic church history, this class will pursue some of the primary themes and expressions of spiritual life within the church's history. We will consider spiritual tradition as lived out in the lives of individuals, communities of faith and revitalization movements during the second century and through the twelfth century. The class will also seek to relate insights from the history of spirituality to forms of christian spirituality as experienced and expressed in contemporary spiritualities.</p>	<p>CHST 2113 History of Christian Spiritualities II (13th-20th centuries) This class is the second part of History of Christian Spiritualities. It focuses on the 13th-20th centuries. (See description of CHST 2103 History of Christian Spiritualities I). CHST 2103 History of Christian Spiritualities I is not a prerequisite.</p>	<p>CLDR 1203 Pastoral Care and Administration A course which addresses the duties of the pastor as they relate to pastoral care and administration. In the first section of the course, special attention is given to the principles and practices of pastoral care, including hospital visitation and pastoral counseling. In the second section of the course, special attention is given to the principles and practices of pastoral administration, including legal issues, managerial accounting procedures, Assemblies of God church polity, strategic planning and assessment, development and management of volunteer workers and paid staff and community relations. (Prerequisites: PSYC 1103 General Psychology, CLDR 1103 Pentecostal Ministry and Leadership and THEO 2113 Introduction to Spiritual Formation, and CLDR 2103 Issues in Church Leadership.)</p>	<p>CLDR 2103 Issues in Church Leadership A course which addresses contemporary issues in church leadership. In the first section of the course, lectures will be presented by individuals who have recognized leadership within Pentecostal/Evangelical churches and para-church organizations. In the second section of the course, students will be required to conduct observations within local lab churches. Special attention will be given to examining the history, mission, vision, philosophy of ministry, programs and organizational processes within these lab churches.</p>	<p>CLDR 2203 Evangelism This course will include class instruction, weekly assignments and practical training, in how to share and how not to share your faith. Class instruction will cover such items as the proper use of personal testimony, handling objections, a presentation of the gospel, illustrations, do's and don'ts of witnessing, and follow-up of the new believer. Weekly assignments will include required reading, memorization of scripture, the gospel outline, illustrations, the development of a personal testimony, prayer, and building relationships with unbelievers. On-the-job training may involve visitation of referrals we receive from local churches, surveys on university campuses as well as bridges you will build with a non-Christian. Elective course, offered Fall, alternating years.</p>	<p>CLDR 2273 Introduction to Church Ministries This class will orientate adult reentry students to adult learning theory, ministry career analysis, methodology in religious studies, personality analysis in relation to ministry preparation, time management, and other issues affecting the adult reentry student. This course is a prerequisite to courses offered in the Extension Education Church Ministries program.</p>	<p>CLDR 4201 Seminar in Ministry A course designed to assist students in integrating his/her studies with the requirements for ministry placement. (Prerequisite: must have senior status.)</p>	<p>CLDR 4906 Pastoral Internship A field-based course in which students demonstrate general attributes and competencies necessary for effective pastoral leadership within the local church. Other requirements for the course include the completion of selected required reports and a minimum of 300 hours of supervised field ministry within a local church. (Prerequisite: must have senior status.)</p>	<p>CLDR Special courses Special courses are offered periodically. See page 122 of the catalog for descriptions of special courses.</p>	<p>CMIN — Children's Ministries A course designed to survey programs, issues and philosophies relating to children's ministries. Special attention is given to current trends and requirements for effective ministry leadership within children's ministry.</p>	
EDUC—Education	<p>EDUC 1001 Study Skill Tutorial—Basic This course is designed to provide students with an opportunity to develop their study skills to a level of competence which will ensure success in college level course work. Study strategies are discussed and applied in both a classroom and laboratory setting.</p>	<p>EDUC 1102 Issues in Education for Adult Learners This course is required for enrollment in the External Degree Program (EDP). Emphasis will be given to adult learning theory, adult learning needs, career analysis, degree planning, research methodology, distance learning procedures, self-esteem, time management, stress management, nutrition and exercise strategies for adults. Individualized projects are required.</p>	<p>EDUC 1200 Future Teachers' Seminar This course is designed to provide students interested in going on into teaching as a profession information on California credential requirements, the realities of the teaching profession, subject matter competency requirements, and self-assessment skills related to their match for the profession. (May be taken more than once)</p>	<p>EDUC 2001 Study Skills—Advanced This course is designed as a continuation of the Study Skills Tutorial for those students who desire to continue to develop their academic skills. Completion of Study Skills I is required.</p>	<p>EDUC 3201 Issues In Education Current topics in the field of education, such as diversity, AIDS, national standards, and assessment, will be presented and discussed in a seminar format. Juniors in the Teacher Education Program - Liberal Studies major are required to enroll in this course. In this course students begin work on their Senior Portfolio and Senior Thesis. During the senior year students complete and present these projects in the required course, ENGL 4101 Writing Lab.</p>	<p>EDUC 4103 Foundations In Literacy, Reading, Writing, and Language Instruction See EDUC 5113 for course description.</p>	<p>EDUC 4203 Linguistics for Educators See EDUC 5203 for course description.</p>	<p>EDUC 4502 Educational Psychology See EDUC 5502 for course description.</p>	<p>EDUC 4703 Curriculum and Instructional Design See EDUC 5703 for course description.</p>								
CMMN 2313 Issues and Creative Strategies in Children's Ministries	<p>A course which presents specific paradigms of children's ministerial programs and creative strategies in children's ministries. In the first part of the course, selected children's ministry paradigms will be presented, along with specific, preassigned issues and practical matters relating to children's ministries. In the second part of the course, creative strategies in children's ministries will be presented which incorporate such communication tools and mediums as computers, desktop publishing, Internet, web page, multi-media, sound systems, video productions, drama and music. (Prerequisite: CMIN 1103 Principles of Children's Ministries.)</p>	<p>CMMN 2103 Child Growth and Development See PSYCH 2103.</p>	<p>CMMN 3123 Principles & Practices to Enhance Self Esteem in Children and Adolescents See PSYCH 3123.</p>	<p>CMMN 3913 Children's Ministries Practicum A course which requires students to serve in an actual and specific role within a pre-approved children's ministries program. Work will be completed under the auspices of a Bethany faculty member in conjunction with a minister serving in children's ministries.</p>	<p>CMMN 4943 Children's Ministries Senior Project A course which requires students to construct a project that helps demonstrate that the objectives of the Children's Ministries component of the program has been successfully fulfilled. Furthermore, the requirements for the project will be constructed so that students can demonstrate that they have properly integrated the Children's Ministries core with the Church Leadership Core.</p>	<p>CMMN Special Courses Special courses are offered periodically. See page 122 of the catalog for descriptions of special courses.</p>	<p>ECON—Economics Economics/Personal Finance</p>	<p>This course is a survey of financial information necessary for the modern world. Included will be tax forms, bank accounts and loans, equity, life insurance and the stock market. Light writing requirement.</p>	<p>ECON 1103 Consumer Economics See BUSI 2103</p>	<p>ECON 2103 Macroeconomics See BUSI 2113</p>	<p>ECON 2113 Microeconomics See BUSI 2113</p>	<p>ECON Special courses Special courses are offered periodically. See page 122 of the catalog for descriptions of special courses.</p>	<p>CMIN 1103 Principles of Children's Ministries A course designed to survey programs, issues and philosophies relating to children's ministries. Special attention is given to current trends and requirements for effective ministry leadership within children's ministry.</p>				
EDUC—Education	<p>EDUC 1001 Study Skill Tutorial—Basic This course is designed to provide students with an opportunity to develop their study skills to a level of competence which will ensure success in college level course work. Study strategies are discussed and applied in both a classroom and laboratory setting.</p>	<p>EDUC 1102 Issues in Education for Adult Learners This course is required for enrollment in the External Degree Program (EDP). Emphasis will be given to adult learning theory, adult learning needs, career analysis, degree planning, research methodology, distance learning procedures, self-esteem, time management, stress management, nutrition and exercise strategies for adults. Individualized projects are required.</p>	<p>EDUC 1200 Future Teachers' Seminar This course is designed to provide students interested in going on into teaching as a profession information on California credential requirements, the realities of the teaching profession, subject matter competency requirements, and self-assessment skills related to their match for the profession. (May be taken more than once)</p>	<p>EDUC 2001 Study Skills—Advanced This course is designed as a continuation of the Study Skills Tutorial for those students who desire to continue to develop their academic skills. Completion of Study Skills I is required.</p>	<p>EDUC 3201 Issues In Education Current topics in the field of education, such as diversity, AIDS, national standards, and assessment, will be presented and discussed in a seminar format. Juniors in the Teacher Education Program - Liberal Studies major are required to enroll in this course. In this course students begin work on their Senior Portfolio and Senior Thesis. During the senior year students complete and present these projects in the required course, ENGL 4101 Writing Lab.</p>	<p>EDUC 4103 Foundations In Literacy, Reading, Writing, and Language Instruction See EDUC 5113 for course description.</p>	<p>EDUC 4203 Linguistics for Educators See EDUC 5203 for course description.</p>	<p>EDUC 4502 Educational Psychology See EDUC 5502 for course description.</p>	<p>EDUC 4703 Curriculum and Instructional Design See EDUC 5703 for course description.</p>	<p>EDUC 4806 Domestic Student Teaching and Internship A course which addresses the essential components regarding ministry and leadership. Special attention will be given to the foundational principles of effective ministry and leadership. The course will also examine the role of character, intercultural awareness, and professional excellence within ministry and leadership.</p>	<p>CLDR 1203 Pastoral Care and Administration A course which addresses the duties of the pastor as they relate to pastoral care and administration. In the first section of the course, special attention is given to the principles and practices of pastoral care, including hospital visitation and pastoral counseling. In the second section of the course, special attention is given to the principles and practices of pastoral administration, including legal issues, managerial accounting procedures, Assemblies of God church polity, strategic planning and assessment, development and management of volunteer workers and paid staff and community relations. (Prerequisites: PSYC 1103 General Psychology, CLDR 1103 Pentecostal Ministry and Leadership and THEO 2113 Introduction to Spiritual Formation, and CLDR 2103 Issues in Church Leadership.)</p>	<p>CLDR 2103 Issues in Church Leadership A course which addresses contemporary issues in church leadership. In the first section of the course, lectures will be presented by individuals who have recognized leadership within Pentecostal/Evangelical churches and para-church organizations. In the second section of the course, students will be required to conduct observations within local lab churches. Special attention will be given to examining the history, mission, vision, philosophy of ministry, programs and organizational processes within these lab churches.</p>	<p>CLDR 2203 Evangelism This course will include class instruction, weekly assignments and practical training, in how to share and how not to share your faith. Class instruction will cover such items as the proper use of personal testimony, handling objections, a presentation of the gospel, illustrations, do's and don'ts of witnessing, and follow-up of the new believer. Weekly assignments will include required reading, memorization of scripture, the gospel outline, illustrations, the development of a personal testimony, prayer, and building relationships with unbelievers. On-the-job training may involve visitation of referrals we receive from local churches, surveys on university campuses as well as bridges you will build with a non-Christian. Elective course, offered Fall, alternating years.</p>	<p>CLDR 2273 Introduction to Church Ministries This class will orientate adult reentry students to adult learning theory, ministry career analysis, methodology in religious studies, personality analysis in relation to ministry preparation, time management, and other issues affecting the adult reentry student. This course is a prerequisite to courses offered in the Extension Education Church Ministries program.</p>	<p>CLDR 4201 Seminar in Ministry A course designed to assist students in integrating his/her studies with the requirements for ministry placement. (Prerequisite: must have senior status.)</p>	<p>CLDR 4906 Pastoral Internship A field-based course in which students demonstrate general attributes and competencies necessary for effective pastoral leadership within the local church. Other requirements for the course include the completion of selected required reports and a minimum of 300 hours of supervised field ministry within a local church. (Prerequisite: must have senior status.)</p>	<p>CLDR Special</p>

<p>EDUC 5000 Advancement to Candidacy Candidates in the Master of Arts in Education program must advancement to candidacy Candidates in the Teaching Credential Research Seminar and Project II. Candidates in the Educational Leadership Emphasis program must advance to candidacy before they enroll in EDUC 5902 Supervised Internship.</p> <p>EDUC 5101 Computer Literacy for Teachers This course focuses on the use of computer hardware and software, computer terminology, operation and care of computer related hardware, troubleshooting techniques, utilization of word-processing skills effectively in a variety of formats, and email basics. This course is a prerequisite for EDUC 5201 Technology & Society, EDUC 5211 Data bases & Spreadsheets for Teachers, and EDUC 5221 Presentations. Home pages, and Web based Instructional Applications.</p> <p>EDUC 5103 Historical Perspectives and Contemporary Issues in Education</p>	<ul style="list-style-type: none"> * Prerequisite: a course in linguistics * Concurrent experience in a 7th - 12th grade classroom is required * Successful completion of this course is one of the prerequisites for Student Teaching <p>EDUC 5143 Human Relations and Crosscultural Skills Techniques for working collaboratively with colleagues and community groups, in conjunction with problem solving and conflict resolution strategies, will be presented in relation to the educational context. Emphasis will be on working within the diverse social milieu of the contemporary public school environment. Prerequisite: Acceptance into the Master of Arts in Education program with teaching credential.</p> <p>EDUC 5201 Technology and Society This course will address the historical, social, ethical and legal issues related to implementing computer-based technology in the teaching-learning environment. Key topics will include: the history of computers, including the industrial and social implications; copyright issues; limiting student access to the Internet; ethical concerns related to computer software and Internet use including such issues as appropriate use of classrooms, confidentiality of records on students, Acceptable Use Policies (AUP); and the evaluation of Internet sites and software in relation to bias, authenticity, and reliability of information and sources. Course strategies will include lecture, video, and hands-on activities including evaluation of software and Internet sites. Prerequisites: Acceptance into the Teacher Education Program and EDUC 5101 Computer Literacy for Teachers (or equivalent). Lab fee required.</p>	<p>EDUC 5113 Foundations in Literacy: Reading, Writing, and Language Instruction (MS) This course involves a study of various approaches to teaching reading, listening, speaking, and writing skills as interrelated processes. Emphasis is on providing the knowledge base and instructional skills necessary to teach all students, including English Language learners, and proficient readers, through systematic and explicit instructional strategies. Topics included are: phonemic awareness, phonics, word identification strategies, spelling, vocabulary development, literature, writing as a process, diagnostic, formative, and summative assessment strategies, content-based reading, comprehension strategies for expository text and literature, and the classroom, home and community environments as settings for literacy learning. This course provides cohesive connections between the Reading Instruction Competence Assessment (RICCA) content specifications and program coursework and field experiences.</p> <p>* Prerequisite: Acceptance into Teacher Education Program.</p> <p>* Prerequisite: a course in linguistics.</p> <p>* Concurrent experience in a linguistically and/or culturally diverse classroom where reading is taught is required.</p> <p>* Successful completion of this course with a "C" or higher is one of the prerequisites for Student Teaching.</p>	<p>EDUC 5123 School Law This course examines the legal aspects of education affecting administrators, teachers, staff, students, parents, and board members. Topics covered will include the structure of the court system, due process, constitutional rights, tort liability, discrimination, and separation of church and state.</p>	<p>EDUC 5133 Foundations in Literacy: Reading, Writing, and Language Instruction (SS) This course involves a study of effective research-based instruction in content-based reading and writing skills for all students, with a focus on students in grades 7 through 12. Candidates learn various approaches and methods in reading which are linked to the state-adopted English Language Arts content standards and the Reading/Language Arts Framework, and to state-adopted standards for academic course content. In addition, strategies which make instruction explicit and meaningful for English language learners, speakers of English, and students with special needs and abilities will be presented. Topics covered include developing student background knowledge and vocabulary, reading comprehension strategies, text structure analysis, summarizing, questioning, summarizing, decoding, spelling, diagnostic strategies, oral and written language, as well as areas of difficulty in reading are covered.</p> <p>* Prerequisite: Acceptance into Teacher Education Program.</p>	<p>EDUC 5221 Presentations, Home Pages, and Web-based Instructional Applications</p>	<p>This course provides students with the necessary knowledge and skills to develop classroom presentations utilizing computer-assisted media tools, to design and implement lesson and classroom learning activities utilizing web-based resources, and to design, develop and maintain a classroom home page. Emphasis will be on helping teacher candidates become critical and reflective users of technology in the instructional process, including assessment of instructional effectiveness, student progress, and personal presentation skills. Prerequisites: Acceptance into the Teacher Education Program, and EDUC 5211 Data Bases and Spreadsheets for Teachers (or equivalent). Lab fee required.</p>	
<p>EDUC 5422 School Finance and Business Management II</p>	<p>This is the second course in a two-course sequence which explores the economics and finance of education including public and private schools and the basic business operations of a school. Topics covered will include taxation for public schools, politics of school financing, planning and developing the school finance program, budget development and control, financing of capital outlay, fund raising, personnel policies and salaries, office management, and campus development. Financial constraints on Christian schools will be a major topic of discussion.</p>	<p>EDUC 5502 Educational Psychology</p>	<p>This course is designed to provide the candidate with information on research and theories related to the cognitive, affective, social, and personal development of students. Theories and research will be discussed in light of their application to students representing specific groups such as those who are English learners, students having disabilities, gifted and talented students, and students having physical and health problems, or representing varying socioeconomic groups. Emphasis is placed on the application of research to the establishment of a classroom environment, which will optimize learning for all students.</p>	<p>EDUC 5673 Supervision and Leadership</p>	<p>This course explores the process of leadership, decision making, communication principles, organizational growth and maturity as related to leadership styles, planning models, conflict management, and basic personnel management utilizing principles of clinical supervision. An emphasis will be placed upon formative, rather than summative, assessments of personnel. Organizational systems will be critically analyzed in relationship to the various functions of the student's school or other organization.</p>	<p>EDUC 5703 Curriculum and Instructional Design</p>	<p>This course is designed to provide teaching credential candidates with the necessary knowledge and skills to plan effective instruction using explicit and inquiry lesson models and short and long-term planning based on state and locally-adopted content standards. Multiple assessment measures to determine student needs and abilities, and the incorporation of results into the instructional process, will also be taught. In addition, candidates learn to create an instructional environment and utilize strategies which differentiate instruction for students based on the students' backgrounds and needs. The impact of family, culture, language, gender, developmental level, and academic abilities, including students having disabilities, and gifted students, are discussed as they relate to developing lesson plans and units of study.</p>
<p>EDUC 5422 School Finance and Business Management I</p>	<p>This is the first in a two-course sequence which explores the economics and finance of education including public and private schools and the basic business operations of a school. Topics covered will include taxation for public schools, politics of school financing, planning and developing the school finance program, budget development and control, financing of capital outlay, fund raising, personnel policies and salaries, office management, and campus development. Financial constraints on Christian schools will be a major topic of discussion.</p>	<p>EDUC 5203 Linguistics for Educators</p>	<p>This course presents a study of language in a social/cultural context including morphology (the structure of words), grammar and semantics (the structure of meaning in communication), and phonetics and phonology (sound systems in language). Particular focus is placed on the structure of English with comparisons to other language systems. Skills acquired in this course are applied to the educational context. Issues specific to classroom teaching of both primary and secondary language learners are discussed. Prerequisite: Acceptance into the Teacher Education Program or by approval of instructor. Note: Candidates taking this course for a California teaching credential requirement must receive a grade of "C" or higher.</p>	<p>EDUC 5211 Data Bases and Spreadsheets for Teachers</p>	<p>This course presents the necessary skills and information needed to effectively develop and utilize data bases and spreadsheets for a variety of classroom applications, including grading, curriculum planning, communication with parents, and instruction. Software and web sites will be evaluated to determine sources of reliable and valid data. Prerequisites: Acceptance into the Teacher Education Program, EDUC 5101 Computer Literacy for Teachers (or equivalent) and EDUC 5201 Technology and Society. Lab fee required.</p>		

EDUC 5422 School Finance and Business Management II

This is the second course in a two-course sequence which explores the economics and finance of education including public and private schools and the basic business operations of a school. Topics covered will include taxation for public schools, politics of school financing, planning and developing the school finance program, budget development and control, financing of capital outlay, fund raising, personnel policies and salaries, office management, and campus development. Financial constraints on Christian schools will be a major topic of discussion.

EDUC 5502 Educational Psychology

This course is designed to provide the candidate with information on research and theories related to the cognitive, affective, social, and personal development of students. Theories and research will be discussed in light of their application to students representing specific groups such as those who are English learners, students having disabilities, gifted and talented students, and students having physical and health problems, or representing varying socioeconomic groups. Emphasis is placed on the application of research to the establishment of a classroom environment, which will optimize learning for all students.

EDUC 5673 Supervision and Leadership

This course explores the process of leadership, decision making, communication principles, organizational growth and maturity as related to leadership styles, planning models, conflict management, and basic personnel management utilizing principles of clinical supervision. An emphasis will be placed upon formative, rather than summative, assessments of personnel. Organizational systems will be critically analyzed in relationship to the various functions of the student's school or other organization.

EDUC 5703 Curriculum and Instructional Design

This course is designed to provide teaching credential candidates with the necessary knowledge and skills to plan effective instruction using explicit and inquiry lesson models and short and long-term planning based on state and locally-adopted content standards. Multiple assessment measures to determine student needs and abilities, and the incorporation of results into the instructional process, will also be taught. In addition, candidates learn to create an instructional environment and utilize strategies which differentiate instruction for students based on the students' backgrounds and needs. The impact of family, culture, language, gender, developmental level, and academic abilities, including students having disabilities, and gifted students, are discussed as they relate to developing lesson plans and units of study.

EDUC 5422 School Finance and Business Management I

This is the first in a two-course sequence which explores the economics and finance of education including public and private schools and the basic business operations of a school. Topics covered will include taxation for public schools, politics of school financing, planning and developing the school finance program, budget development and control, financing of capital outlay, fund raising, personnel policies and salaries, office management, and campus development. Financial constraints on Christian schools will be a major topic of discussion.

EDUC 5203 Linguistics for Educators

This course presents a study of language in a social/cultural context including morphology (the structure of words), grammar and semantics (the structure of meaning in communication), and phonetics and phonology (sound systems in language). Particular focus is placed on the structure of English with comparisons to other language systems. Skills acquired in this course are applied to the educational context. Issues specific to classroom teaching of both primary and secondary language learners are discussed. Prerequisite: Acceptance into the Teacher Education Program or by approval of instructor. Note: Candidates taking this course for a California teaching credential requirement must receive a grade of "C" or higher.

EDUC 5211 Data Bases and Spreadsheets for Teachers

This course presents the necessary skills and information needed to effectively develop and utilize data bases and spreadsheets for a variety of classroom applications, including grading, curriculum planning, communication with parents, and instruction. Software and web sites will be evaluated to determine sources of reliable and valid data. Prerequisites: Acceptance into the Teacher Education Program, EDUC 5101 Computer Literacy for Teachers (or equivalent) and EDUC 5201 Technology and Society. Lab fee required.

EDUC 5422 School Finance and Business Management II

This is the second course in a two-course sequence which explores the economics and finance of education including public and private schools and the basic business operations of a school. Topics covered will include taxation for public schools, politics of school financing, planning and developing the school finance program, budget development and control, financing of capital outlay, fund raising, personnel policies and salaries, office management, and campus development. Financial constraints on Christian schools will be a major topic of discussion.

EDUC 5502 Educational Psychology

This course is designed to provide the candidate with information on research and theories related to the cognitive, affective, social, and personal development of students. Theories and research will be discussed in light of their application to students representing specific groups such as those who are English learners, students having disabilities, gifted and talented students, and students having physical and health problems, or representing varying socioeconomic groups. Emphasis is placed on the application of research to the establishment of a classroom environment, which will optimize learning for all students.

EDUC 5673 Supervision and Leadership

This course explores the process of leadership, decision making, communication principles, organizational growth and maturity as related to leadership styles, planning models, conflict management, and basic personnel management utilizing principles of clinical supervision. An emphasis will be placed upon formative, rather than summative, assessments of personnel. Organizational systems will be critically analyzed in relationship to the various functions of the student's school or other organization.

EDUC 5703 Curriculum and Instructional Design

This course is designed to provide teaching credential candidates with the necessary knowledge and skills to plan effective instruction using explicit and inquiry lesson models and short and long-term planning based on state and locally-adopted content standards. Multiple assessment measures to determine student needs and abilities, and the incorporation of results into the instructional process, will also be taught. In addition, candidates learn to create an instructional environment and utilize strategies which differentiate instruction for students based on the students' backgrounds and needs. The impact of family, culture, language, gender, developmental level, and academic abilities, including students having disabilities, and gifted students, are discussed as they relate to developing lesson plans and units of study.

EDUC 5422 School Finance and Business Management I

This is the first in a two-course sequence which explores the economics and finance of education including public and private schools and the basic business operations of a school. Topics covered will include taxation for public schools, politics of school financing, planning and developing the school finance program, budget development and control, financing of capital outlay, fund raising, personnel policies and salaries, office management, and campus development. Financial constraints on Christian schools will be a major topic of discussion.

EDUC 5203 Linguistics for Educators

This course presents a study of language in a social/cultural context including morphology (the structure of words), grammar and semantics (the structure of meaning in communication), and phonetics and phonology (sound systems in language). Particular focus is placed on the structure of English with comparisons to other language systems. Skills acquired in this course are applied to the educational context. Issues specific to classroom teaching of both primary and secondary language learners are discussed. Prerequisite: Acceptance into the Teacher Education Program or by approval of instructor. Note: Candidates taking this course for a California teaching credential requirement must receive a grade of "C" or higher.

EDUC 5211 Data Bases and Spreadsheets for Teachers

This course presents the necessary skills and information needed to effectively develop and utilize data bases and spreadsheets for a variety of classroom applications, including grading, curriculum planning, communication with parents, and instruction. Software and web sites will be evaluated to determine sources of reliable and valid data. Prerequisites: Acceptance into the Teacher Education Program, EDUC 5101 Computer Literacy for Teachers (or equivalent) and EDUC 5201 Technology and Society. Lab fee required.

EDUC 5422 School Finance and Business Management II

This is the second course in a two-course sequence which explores the economics and finance of education including public and private schools and the basic business operations of a school. Topics covered will include taxation for public schools, politics of school financing, planning and developing the school finance program, budget development and control, financing of capital outlay, fund raising, personnel policies and salaries, office management, and campus development. Financial constraints on Christian schools will be a major topic of discussion.

EDUC 5502 Educational Psychology

This course is designed to provide the candidate with information on research and theories related to the cognitive, affective, social, and personal development of students. Theories and research will be discussed in light of their application to students representing specific groups such as those who are English learners, students having disabilities, gifted and talented students, and students having physical and health problems, or representing varying socioeconomic groups. Emphasis is placed on the application of research to the establishment of a classroom environment, which will optimize learning for all students.

EDUC 5673 Supervision and Leadership

This course explores the process of leadership, decision making, communication principles, organizational growth and maturity as related to leadership styles, planning models, conflict management, and basic personnel management utilizing principles of clinical supervision. An emphasis will be placed upon formative, rather than summative, assessments of personnel. Organizational systems will be critically analyzed in relationship to the various functions of the student's school or other organization.

EDUC 5703 Curriculum and Instructional Design

This course is designed to provide teaching credential candidates with the necessary knowledge and skills to plan effective instruction using explicit and inquiry lesson models and short and long-term planning based on state and locally-adopted content standards. Multiple assessment measures to determine student needs and abilities, and the incorporation of results into the instructional process, will also be taught. In addition, candidates learn to create an instructional environment and utilize strategies which differentiate instruction for students based on the students' backgrounds and needs. The impact of family, culture, language, gender, developmental level, and academic abilities, including students having disabilities, and gifted students, are discussed as they relate to developing lesson plans and units of study.

EDUC 5422 School Finance and Business Management I

This is the first in a two-course sequence which explores the economics and finance of education including public and private schools and the basic business operations of a school. Topics covered will include taxation for public schools, politics of school financing, planning and developing the school finance program, budget development and control, financing of capital outlay, fund raising, personnel

EDUC 5773 Strategic Planning

This course concentrates on the use of strategic planning as a critical tool for the development, implementation, administration, and assessment of an organization, and in particular an educational organization. Students will review strategic planning as an organizational tool, including its assumptions, strengths, and weaknesses. Students will also formulate their own strategic plan for their own organizations, including the mission and purpose statements, history and background of the organization, the resources and plan for implementing and evaluating the organization, and the assessment of their strategic plan. This plan will form the basis for the Supervised Internship and final thesis project which requires the completion of another strategic plan.

EDUC 5783 Research Design and Statistical Procedures

This course deals with the fundamentals necessary for students to complete a comprehensive research project for the social science genre. Students will become familiar with the latest quantitative, qualitative, experimental and quasi-experimental research methodology. Attention is given to design characteristics for a research project, program evaluation, various data gathering approaches and basic statistical procedures for evaluating the data as they apply in organizational contexts, such as private schools and youth programs. Prerequisite: Acceptance into the M.A. in Education program or permission of instructor.

EDUC 5803 Language Acquisition Theory and Classroom Practices

This course provides the pre-service student with an overview of the issues relating to first and second language acquisition. Course content includes examination of effective educational programs for students who are linguistically, socioeconomically, and/or culturally diverse. The interaction of political, social, psychological, and economics on language learners and on pedagogy are explored with an emphasis on practical application within the classroom. Prerequisites:

a course in linguistics
acceptance into the Teacher Education Program

NOTE: Satisfactory completion of this course with a letter grade of "C" or higher is one prerequisite for EDUC 5899/5909 Student Teaching.

EDUC 5841 Educational Research Seminar and Project II

This graduate level course is designed to provide students with the opportunity to utilize research methodologies within the educational context. Students will implement their research proposal designed and approved in EDUC 5831 Educational Research Seminar and Project I. This course is graded CR/NCR.

Prerequisites:
EDUC 5783 Research Design and Statistical Procedures
EDUC 5831 Educational Research Seminar and Project I
EDUC 5000 Advancement to Candidacy

NOTE 2: Students not achieving the required standards established by the Commission on Teacher Credentialing and the Teacher Education Program during their student teaching experience may not be recommended for a credential, or may be required to do additional training to verify competence. Individuals may be able to acquire the appropriate knowledge within the college classroom, but not be able to work within the dynamics of the public school classroom and/or the private school, and community context. Every attempt is made to select candidates who will be successful at the beginning of the program. In the event that issues arise throughout the program, it is the goal of Bethany's Teacher Education Credential Program to provide help and training to ensure every student's success; however, development of the necessary interpersonal, management, and social skills required may be beyond the scope of the program.

NOTE 3: The candidate may appeal decisions of the Teacher Education Program Graduate Council to the Academic Dean's Office.

EDUC 5851 Educational Research Seminar and Project III

This graduate level course is designed to provide students with the opportunity to utilize research methodologies within the educational context. Students will implement their research proposal designed and approved in EDUC 5831 Educational Research Seminar and Project I. This course is designed for the working professional during their induction phase of teaching. Course activities will be designed to facilitate their skills in linking technology-enhanced instruction with assessment as it relates to student learning. In addition, they will be provided opportunities to collaborate with other professionals in the field in terms of the planning, implementation, and assessment of educational goals through technology-enhanced classroom environments. Prerequisites: Acceptance into the Teacher Education Program, Preliminary teaching credential and EDUC 5221: Presentations, Home Pages, and Web-based Instructional Applications (or equivalent). Note: This course may count toward elective units for students selected into the M.A. in Education program.

EDUC 5899 Student Teaching (Multiple Subjects)

Student teaching consists of a minimum of sixteen weeks of classroom training as a time of final preparation for a possible career in education. The Teacher Performance Expectations are integral to the student teaching process and serve to prepare the candidate for the Teacher Performance Assessment. It requires the student to put into practice the knowledge gained in his/her professional course work under the immediate direction of a master teacher and with the oversight of the college supervisor. The successful completion of student teaching fulfills one of the requirements needed to be recommended for a California teaching credential or an Association of Christian Schools International (ACSI) Teaching credential. Student Teaching fee applies.

NOTE 1: Prerequisites which must be completed with a grade of "C" or above, and with an average GPA of 3.0 or higher, as well as with a satisfactory recommendation from the candidate's professors and field supervisors include: Classroom Management, Curriculum and Instructional Design, Foundations of Literacy: Reading, Writing, and Language Instruction, Language Acquisition Theory and Classroom Practices, and Supervised Field Experience.

NOTE 2: Students not achieving the required standards established by the Commission on Teacher Credentialing and the Teacher Education Program during their student teaching experience may not be recommended for a credential, or may be required to do additional training to verify competence. Individuals may be able to acquire the appropriate knowledge within the college classroom, but not be able to work within the dynamics of the public school classroom and/or the private school, and community context. Every attempt is made to select candidates who will be successful at the beginning of the program. In the event that issues arise throughout the program, it is the goal of Bethany's Teacher Education Credential Program to provide help and training to ensure every student's success; however, development of the necessary interpersonal, management, and social skills required may be beyond the scope of the program.

NOTE 3: The candidate may appeal decisions of the Teacher Education Program Graduate Council to the Academic Dean's Office.

EDUC 5902 Supervised Internship

This course provides the opportunity for students to apply the knowledge gained in the Master's in Education coursework to an actual supervised administrative experience in a school or organizational setting. The student will be placed under the supervision of the administrator of a school, or other organization, in conjunction with an assigned college supervisor. The student will be assigned significant administrative tasks in the school, or organization, during the internship. A minimum of 90 hours of supervised administrative experience is required. The student will conclude the experience by writing a major paper and defending the conclusions of the paper before a faculty committee. Prerequisite:
*Satisfactory completion of EDUC 5000 Advancement to Candidacy

NOTE: Students seeking the ACSI administrative credential must complete the experience in a private school setting approved by the College.
NOTE: The faculty committee will consist of no less than the assigned college supervisor and one other designated faculty member.

EDUC 5909 Student Teaching (Single Subject)

Student teaching consists of a minimum of sixteen weeks of classroom training as a time of final preparation for a possible career in education. The Teacher Performance Expectations are integral to the student teaching process and serve to prepare the candidate for the Teacher Performance Assessment. It requires the student to put into practice the knowledge gained in his/her professional course work under the immediate direction of a master teacher and with the oversight of the college supervisor. The successful completion of student teaching fulfills one of the requirements needed to be recommended for a California teaching credential or an Association of Christian Schools International (ACSI) Teaching credential. Student Teaching fee applies.

NOTE 1: Prerequisites which must be completed with a grade of "C" or above, and with an average GPA of 3.0 or higher, as well as with a satisfactory recommendation from the candidate's professors and field supervisors include: Classroom Management, Curriculum and Instructional Design, Foundations of Literacy: Reading, Writing, and Language Instruction, Language Acquisition Theory and Classroom Practices, and Supervised Field Experience.

NOTE 2: Students not achieving the required standards established by the Commission on Teacher Credentialing and the Teacher Education Program during their student teaching experience may not be recommended for a credential, or may be required to do additional training to verify competence. Individuals may be able to acquire the appropriate knowledge within the college classroom, but not be able to work within the dynamics of the public school classroom and/or the private school, and community context. Every attempt is made to select candidates who will be successful at the beginning of the program. In the event that issues arise throughout the program, it is the goal of Bethany's Teacher Education Credential Program to provide help and training to ensure every student's success; however, development of the necessary interpersonal, management, and social skills required may be beyond the scope of the program.

NOTE 3: The candidate may appeal decisions of the Teacher Education Program Graduate Council to the Academic Dean's Office.

with a letter grade of "C" or higher is one prerequisite for Student Teaching.
* Lab fee of \$35.00

EDUC Special courses

Special courses are offered periodically. See page 122 of the catalog for descriptions of special courses.

ENGL—English

ENGL 1003 English Fundamentals
Structure of standard American English, grammatical relationships, words, and forms. Practice in analyzing and constructing sentences, paragraphs, spelling, and punctuation.

ENGL 1103 Written and Oral Communication

ENGL 1103 English Composition and Grammar
The exploration and analysis of culturally and cross-culturally diverse speeches and essays, and the sharpening of language arts skills that will contribute to the clarity and accuracy of the student's communication. The course emphasizes the interrelationship of listening, speaking, reading, and writing. (Prerequisite: qualifying score on entrance exams or passing grade in ENGL 1003 English Fundamentals.)

ENGL 1123 Introduction to Literature
An introduction to such basic genres as poetry, drama and the short story and the tools for comprehending them. Emphasis on explication and expository writing. Discussions and writing on fictive works provide students opportunity to develop critical and analytical skills. (Prerequisite: ENGL 1113 English Composition and Grammar or ENGL 1103 Written and Oral Communication)

ENGL 2103 Children's Literature
[Does not satisfy the General Education literature requirement for most majors] This course provides an introduction to the history, trends, and issues in literature commonly used by children through reading and written and oral expression. It acquaints the student with literature from various genres including fantasy, poetry, folk tales, myths, biographies, legends, historical novels, contemporary novels, and nonfiction. These genres are studied in the context of themes which illustrate the diversity of content found in literature, as well as the diversity represented by the authors and illustrators of children's literature. Observations of children utilizing literature are a required component of the course. (Prerequisite: ENGL 1123 Introduction to Literature)

MATH—Mathematics	
HUFA 2112 Graphic Arts I	Introduction to the theory and practice of graphic arts, design, layout, copy presentation, including supervised workshop in the publication of the campus yearbook. Enrollment requires approval of the yearbook advisor in consultation with the current yearbook editor. This course is offered in the fall semesters. It is expected that the student enroll for this course in the fall, followed by HUFA 2122 Graphic Arts II in the spring.
HUFA 2122 Graphic Arts II	Continuation of HUFA 2112 Graphic Arts I. Enrollment requires approval of the yearbook advisor in consultation with the current yearbook editor. This course is offered in the spring semesters. (Prerequisite: HUFA 2112 Graphic Arts I, or approval of the yearbook advisor)
HIST 4113 Intellectual History of the West	A study of the major intellectual and cultural developments in the West from the Middle Ages to the present. The course compares the philosophical assumptions of European and American life in successive eras as understood by representative figures in science, politics, religion and art.
HIST 4123 Religious History of the United States	The development of the diverse religious traditions of the American people from Colonial times to the present. Attention is given to the social sources and significance of religious ideas and movements in the framework of national history.
HIST 4203 The 20th Century	An intensive study of historical events in this century. Particular emphasis is placed on the rise and fall of communism, fascism, the break up of Colonial empires, and the creation of a world economy.
HUFA Special Courses	Special courses are offered periodically. See page 81 of the catalog for descriptions of special courses.
LIBR—Library	LIBR 2101 Reference Services I Introduction to reference service, identifying and using standard reference sources. Includes philosophy and ethics of reference assistance.
HIST Special Courses	Special courses are offered periodically. See page 122 of the catalog for descriptions of special courses.
HUFA—Humanities & Fine Arts	HUFA 1303 Music and the Arts General survey of music, arts, and literature, and how they have interrelated through various stylistic period (e.g. Renaissance, Baroque, Impressionistic, etc.). Includes a study of the philosophy of human contribution to music and the arts.
HUFA 2103 History and Appreciation of Art	A survey of the history, philosophy, techniques and nature of art. In addition, this course includes an introduction into sketching and drawing.

MATH 2403 Mathematics for General Education	MISS 2213 Church Mission and Church Growth
This is a survey course covering mathematical ideas and concepts in fulfillment of the general education requirement. Emphasis is on analysis and problem-solving of real-life situations utilizing quantitative reasoning methodologies. Special topics in algebra are reviewed, and basic concepts presented in geometry, trigonometry, probability, and statistics. Students will use computer-based mathematical modeling and graphics software. Prerequisite: Appropriate score on Bethany's entry-level mathematics test. Note: This course satisfies Bethany's general education objectives for all AA and BA programs.	Study of theological, sociological, and statistical dimensions of church growth, church planting, and congregational expansion in the United States and overseas. Assesses strengths and weaknesses of the church growth movement and highlights the work of the Holy Spirit and Pentecostal growth in the non-Western World
MISS 2313 Issues in Urban Ministries	MISS 2313 Issues in Urban Ministries
A course which presents paradigms of urban missions ministries from the context of specific geographical, cultural and ethnic contexts by individuals with proven and established leadership in urban missions ministries. Each paradigm presentation will also be required to address specific, preassigned issues and practical matters relating to urban missions ministries.	A course which presents paradigms of world missions ministries from the context of specific geographical, cultural and ethnic contexts by individuals with proven and established leadership in world missions ministries. Each paradigm presentation will also be required to address specific, preassigned issues and practical matters relating to world missions ministries.
MATH 3103 Math Concepts	MATH 3103 Elementary Algebra
This course is a college level presentation of the mathematics normally considered important for comprehensive elementary and middle school mathematics curricula. Topical sequence is roughly equivalent to that used in the elementary curriculum along with an initial segment covering approaches to problem solving. The development of the real number system is also included. Microcomputers will be used where appropriate to facilitate the learning of certain concepts. Prerequisite: Appropriate score on math placement test.	This course briefly reviews arithmetic with integers, fractions, and decimals. It covers linear equations, polynomials, rational expressions, integer exponents, square roots, radical expressions, quadratic equations, and the quadratic formula. Prerequisite: Appropriate score on math placement test.
MATH 3333 Statistics	MATH 1201 Introduction to Computers: Education Lab
See EBUSI 3333 Lab fee required.	See EDUC 1201 See EBUSI 3333 Lab fee required.
MATH Special Courses	MATH 2104 Intermediate Algebra
Special courses are offered periodically. See page 122 of the catalog for descriptions of special courses.	This course is equivalent to second year high school algebra and reviews elementary algebra, including factoring, rational expressions, linear equations and inequalities, exponents, radicals, complex numbers, functions and graphs, quadratic equations, and exponential and logarithmic functions. Prerequisite: Appropriate score on math placement test.
MISS—Missions	MISS 1103 Introduction to Missions
An introductory course in urban and world missions. Special attention will be given to the biblical and theological foundations, history, contemporary trends and demands of missions ministry of urban and world missions.	An introductory course in urban and world missions. Special attention will be given to the biblical and theological foundations, history, contemporary trends and demands of missions ministry of urban and world missions.
MISS 1303 Cultural and Ethnic Diversity	MISS 2203 Intuitive Approach to Geometry
See ANTH 1303	This course discusses the use of computers in the library for finding information on CD-ROM, bibliographic services and the Internet. Some attention will be paid to developing programs for bibliographic instruction. (Prerequisite: LIBR 2101.)
LIBR 2201 Cataloging Services I	LIBR 3101 Cataloging Services I
Introduction to descriptive cataloging and its relationship to machine-readable cataloging. Course work will be both theoretical and practical.	Introduction to descriptive cataloging and its relationship to machine-readable cataloging. Course work will be both theoretical and practical.
LIBR 3201 Cataloging Services II	LIBR 3201 Cataloging Services II
This course will include an introduction to subject cataloging, some discussion of collection organization, both theoretical and practical, and collection development. (Prerequisite: LIBR 3101.)	This course will include an introduction to subject cataloging, some discussion of collection organization, both theoretical and practical, and collection development.
LIBR Special Courses	LIBR 3703 Linguistics
Special courses are offered periodically. See page 122 of the catalog for descriptions of special courses.	See ANTH 3703
HUFA 2103 History and Appreciation of Art	MISS 3903 World Missions Practicum
A survey of the history, philosophy, techniques and nature of art. In addition, this course includes an introduction into sketching and drawing.	A course which requires students to serve in an actual and specific role within a pre-approved World Missions program. Work will be completed under the auspices of a Bethany faculty member in conjunction with a minister serving in world missions.

MISS 3972 Preparation for Short-term Missions Trips	MISS 4103 Cultural Change and World Problems
A course which prepares for and includes ministry through a short-term mission trip. Students prepare for an intense, short-term ministry trip to a selected location. During these times, students are able to apply the training received from other courses in real-life situations. Short-term missions trips may be repeated for credit.	See ANTH 4103
MISS 4113 Cultural Area Studies	MISS 4113 Urban Ministries Practicum
An analysis of a particular culture, worldview, culture, religious history, demography, missionary activity, and historical background are included for study. Particular attention is given to developing the ability to minister effectively to the cultural area of study.	A course which requires students to serve in an actual and specific role within a pre-approved Urban Ministries program. Work will be completed under the auspices of a Bethany faculty member in conjunction with a minister serving in urban ministries.
MISS 4943 World Missions Senior Project	MISS 4943 World Missions Senior Project
A course which requires students to construct a project that helps demonstrate that the objectives of the World Missions component of the program has been successfully fulfilled. Furthermore, the requirements for the project will be constructed so that students can demonstrate that they have properly integrated the World Missions core with the Church Leadership Core.	A course which requires students to construct a project that helps demonstrate that the objectives of the World Missions component of the program has been successfully fulfilled. Furthermore, the requirements for the project will be constructed so that students can demonstrate that they have properly integrated the World Missions core with the Church Leadership Core.
MISS Special Courses	MISS Special Courses
Special courses are offered periodically. See page 122 of the catalog for descriptions of special courses.	Special courses are offered periodically. See page 122 of the catalog for descriptions of special courses.
MUSI—Music	MUSI—Music
MUSI 1003 Fundamentals of Music I	MUSI 1003 Fundamentals of Music I
This course is designed to assist the student with no (or limited) musical training to read, write, and understand the symbols of music notation, and to use this knowledge and skill in a practical way by correlating it with performance and listening activities.	This course is designed to assist the student with no (or limited) musical training to read, write, and understand the symbols of music notation, and to use this knowledge and skill in a practical way by correlating it with performance and listening activities.
MUSI 1013 Fundamentals of Music II	MUSI 1013 Fundamentals of Music II
A continuation of MUSI 1003 or by permission of the instructor.	A continuation of Fundamentals of Music 1. Prerequisite: MUSI 1003 or by permission of the instructor.

MUSI 1021 Computer Music This course is designed to introduce the student to the music lab equipment and software which will be utilized by a number of music classes (e.g., Musicianship, Comprehensive Music Theory, Orchestration). This course is to be taken in the Fall semester of the first year. (The Music Department may elect to waive this requirement for previous experience.)	MUSI 1271 Vocal Ensemble Reading and performance of sacred music in churches and/or standard literature in recitals. By permission of the instructor.	MUSI 2101 Musicianship II Continuation of MUSI 1201 Musicianship I. Includes singing and dictation of modulating melodies containing some altered tones in simple and compound meters. Harmonic dictation of chords containing diatonic triads and introducing seventh and altered chords. The practical application of music theory. (Prerequisite: MUSI 1201 Musicianship II) (MUSI 2113 Comprehensive Music Theory III concurrent.)
MUSI 1101 Musicianship I Proper notation, interval recognition, triad recognition, meter recognition, sight singing, rhythmic dictation, and dictation of diatonic melodies based on scale step motion and leaps within the primary triads. Also covers the practical application of music theory. (MUSI 1113 Comprehensive Music Theory must be taken concurrently)	MUSI 1351 Class Voice Class instruction in the fundamental techniques of vocal reproduction. May be repeated once.	MUSI 2113 Comprehensive Music Theory III Continuation of MUSI 1213 Comprehensive Music Theory II. Study of harmonic practices including Neapolitan sixth, augmented sixth, altered chords, and chromatic modulation. Continued analysis of musical parameters in stylistic context. (Prerequisite: MUSI 1213 Comprehensive Music Theory II) (MUSI 2101 Musicianship II concurrent.)
MUSI 1113 Comprehensive Music Theory I Survey of harmony, melody, and form. Introduction to traditional western harmonic practice including four-part diatonic writings, simple harmonic progressions, typical cadences, basic chord types, and melodies. Introduction to concepts of instrumentation, transposition, and conducting. (MUSI 1101 Musicianship I concurrent.)	MUSI 1501 Piano Required each semester of lower division piano majors. Private instruction in piano technique and performance.	MUSI 2201 Musicianship IV Continuation of MUSI 2101 Musicianship III. Singing and dictation of modulating chromatic melodies in simple and compound meters. Harmonic dictation of four-part chorales with altered chords and modulation. Recognition of twentieth century sonorities. The practical application of music theory. (Prerequisite: MUSI 2113 Musicianship III) (MUSI 2213 Comprehensive Music Theory IV concurrent.)
MUSI 1201 Musicianship II Continuation of MUSI 1101 Musicianship I. Melodies of greater length with wider leaps and some syncopation. Harmonic dictation in recognition of diatonic progressions of triads with inversions. The practical application of music theory. Prerequisite: MUSI 1101 Musicianship (MUSI 1213 Comprehensive Music Theory concurrent.)	MUSI 1511 Organ Required each semester of upper division organ majors. Private instruction in organ technique and performance.	MUSI 2213 Comprehensive Music Theory IV Continuation of MUSI 2113 Comprehensive Music Theory III. Study of compositional practices of the twentieth century. Creative compositions for instruments and voices. (Prerequisite: MUSI 2113 Comprehensive Music Theory III) (MUSI 2201 Musicianship IV concurrent.)
MUSI 1213 Comprehensive Music Theory II Continuation of MUSI 1113 Music Theory I. Study of harmonic practices including sevenths, ninths, elevenths, thirteenth, secondary dominants, and modulation. Continued analysis of musical parameters in stylistic context. (Prerequisite: MUSI 1113 Comprehensive Music Theory I) (MUSI 1201 Musicianship II concurrent.)	MUSI 1541 Brass Required each semester of lower division brass majors. Private instruction in brass technique and performance.	MUSI 3000 Music Recital Music majors are required to attend evening recitals one hour per week. No units are granted. A credit/no credit grade is given.
MUSI 1221 Concert Choir A select mixed chorus open to those who wish to perform concert literature. Limited performances. By permission of the instructor.	MUSI 1561 Strings Required each semester of lower division string majors. Private instruction in string technique and performance.	MUSI 3103 Music History I Chronological survey of the development of the art of music from the ancients through the Renaissance. (Prerequisite: MUSI 1213 Comprehensive Music Theory II or by permission of instructor)
MUSI 1231 Ambassadors A select vocal/instrumental ensemble that travels. (MUSI 1221 Concert Choir concurrent for vocalists)	MUSI 1571 Percussion Required each semester of lower division percussion majors. Private instruction in percussion technique and performance.	MUSI 3203 Music History II Chronological survey of the development of the art of music from the baroque to the present (Prerequisite: MUSI 1213 Comprehensive Music Theory II or by permission of instructor)
MUSI 1241 Piano Ensemble Reading and performance of piano accompaniments.	MUSI 1652 Musical Production Rehearsal and performance of musical or operetta literature. Concentration on all aspects of the production related to performance. By audition only.	MUSI 3212 Conducting Basic choral and instrumental conducting techniques, with emphasis on choral conducting. (Prerequisite: MUSI 1213 Comprehensive Music Theory II or by permission of instructor.)
MUSI 1251 Band An ensemble open to instrumentalists who wish to perform in an instrumental ensemble. By permission of the instructor.	MUSI 2000 Music Recital Music majors are required to attend evening recitals one hour per week. No units are granted. A credit/no credit grade is given.	MUSI 3703 School Music Curriculum Principles and problems of music curriculum development are studied. Emphasis on behavioral objectives and methods best suited to obtaining those objectives.
MUSI 1261 Instrumental Ensemble A select group open to those who wish to perform standard and contemporary literature. By permission of the instructor.		MUSI 3221 Concert Choir See MUSI 1221

MUSI 3241 Piano Ensemble

See MUSI 1241

MUSI 3251 Band

See MUSI 1251

MUSI 3261 Instrumental Ensemble

See MUSI 1261

MUSI 3271 Vocal Ensemble

See MUSI 1271

MUSI 3712 Elementary School Music

Music programs in the elementary school: technology, materials, observations, and performance of school music.

MUSI 3722 Secondary Vocal Music

Vocal music programs in secondary schools: principles, organization, techniques, literature, materials, and observation.

MUSI 3732 Secondary Instrumental Music

Instrumental music programs in secondary schools: principles, organization, techniques, literature, materials, and observation.

MUSI 3912 Practice Teaching

A program for advanced music students selected by the division head. Candidates receive specific coaching in methods and procedures in giving private instruction.

MUSI 4000 Music Recital

Music majors are required to attend evening recitals one hour per week. No units are granted. A credit/no credit grade is given.

MUSI 4212 Advanced Conducting

Advanced choral and instrumental conducting techniques; includes instrumental and vocal score reading and conducting ensembles under supervision. Emphasis on instrumental conducting. (Prerequisite: MUSI 3212 Conducting)

MUSI 4222 Orchestration

The study of ranges, sonorities, transpositions, and technical consideration of orchestral instruments. Scoring short examples for ensembles and orchestra. (Prerequisite: MUSI 2213 Comprehensive Music Theory IV)

MUSI 4242 Counterpoint

Based on the theoretical practice of the eighteenth century historical period. The five species, imitation, canon, and invertible counterpoint studied by analysis and writing. (Prerequisite: MUSI 2213 Comprehensive Music Theory IV)

MUSI 4252 Form and Analysis

Recognition and analysis of the standard forms of music in the historical context of the eighteenth and nineteenth centuries. The opportunity for the writing of original short compositions demonstrating a basic understanding of the various forms. (Prerequisite: MUSI 2213 Comprehensive Music Theory IV)

MUSI 4301 Brass Techniques and Literature

The fundamentals, literature, techniques and ensemble of brass instruments.

MUSI 4311 Percussion Techniques and Literature

The fundamentals, literature, techniques and ensemble of percussion instruments.

MUSI 4321 Strings Techniques and Literature

The fundamentals, literature, techniques and ensemble of strings instruments.

MUSI 4331 Woodwinds Techniques and Literature

The fundamentals, literature, techniques and ensemble of woodwind instruments.

MUSI 4400 Senior Recital

The senior music major will receive a credit/no credit grade for performance in recital. No units are granted.

MUSI Special Courses

Special courses are offered periodically. See page 122 of the catalog for descriptions of special courses.

PBSP—Public Speaking

A basic course in public speaking which combines elementary rhetorical principles with opportunity for individual improvement through practice. The course considers the various aspects of the speaker; his speech, the audience, and the occasion. Practical class presentation of speeches is required.

PBSP 1103 Public Speaking and Persuasion

Theory and principles of persuasion and argumentation, including analysis of lines of argumentation found in contemporary social, political, and religious public addresses. Class presentation of speeches is required. (Prerequisite: PBSP 1103 Public Speaking or instructor consent).

PBSP 2103 Argumentation and Persuasion

Theory and principles of persuasion and argumentation, including analysis of lines of argumentation found in contemporary social, political, and religious public addresses. Class presentation of speeches is required. (Prerequisite: PBSP 1103 Public Speaking or instructor consent).

PEDU—Physical Education

Special courses are offered periodically. See page 122 of the catalog for descriptions of special courses.

PEDU 1101 Introduction to Physical Fitness and Wellness

This course is designed to provide students with the skills to develop and implement their own physical fitness and wellness programs within the context of study of the historical, cultural, and social factors related to physical fitness in the United States. Students are required to implement their own program during the 1201 Nutrition, Self-Esteem, and Exercise, fulfills half of general education requirement.

PEDU 1121 Introduction to Baseball & Softball

This is an introductory course designed to provide the student with a knowledge of the history, fundamental skills, playing rules, and social impacts of baseball and softball.

PEDU 1131 Introduction to Soccer & Football

This is an introductory course designed to provide the student with a history, fundamental skills, playing rules, and social impacts of soccer and football.

PSYC Special Courses

Special courses are offered periodically. See page 122 of the catalog for descriptions of special courses.

SCIE—Science

SCIE 1103 Physical and Earth Sciences

This course surveys the major ideas in astronomy, chemistry, geology, meteorology, oceanography and physics. The relationship of science and technology will be evaluated, with particular concern for the historical context of major discoveries and paradigm shifts and their impact upon human life and thought. Students will be expected to write clear, responsive essays on the concepts presented and respond accurately to objective examinations. (This course satisfies the General Education requirement for all programs.) Prerequisite: Beginning Algebra

PSYC 3313 Testing & Measurement

This course purposes to give an overview of the use of psychological measurements and evaluations. It will cover both teacher-made and standardized tests, how to construct and administer them, the evaluation and utilization of their results, interpretation of test scores, and reporting of student growth. (Prerequisite: PSYC 1103 General Psychology)

PSYC 3323 Psychology of Adulthood and Aging

A study of the central concerns of adulthood and aging examined from a development perspective. Special attention is given to modes of interpersonal interaction and to how one's life view influences and is influenced by the aging process. (Prerequisite: PSYC 1103 General Psychology, and Child Growth and Development, or Adolescent Psychology, or permission of instructor.)

PSYC 3333 Statistics

See BUSI 3333.

PSYC 3433 Research Methods

This course is designed to acquaint the student with basic experimental procedures and designs, laboratory apparatus and the collection and treatment of experimental and correlational data. Several experiments and experimental reports utilizing appropriate statistical procedures are required of each student. (Prerequisite: PSYC 3333 Statistics) Lab fee required.

PSYC 4101 Integration of Psychology and Theology I

A study of the contemporary efforts to develop a psychology consistent with Christian values, focusing on the value of integrative efforts to both the theory and practice of psychology and theology. Discussion includes matters of behavior, cognition, emotion, and motivation. This course involves the writing of a senior thesis. (Prerequisite: PSYC 1103 General Psychology and upper level standing.)

PSYC 4103 Abnormal Psychology

This course is designed to study personality deviation and behavior disorders. The student is acquainted with the nature of the major types of mental disorders, the theories of etiology, and an exposition of the various methods of treatment. Special attention is given to the problems of drug abuse and alcoholism. Field trips to mental health facilities and centers will be included. (Prerequisite: PSYC 1103 General Psychology and upper level standing.)

PSYC 4113 Principles of Counseling

This course explores methods and characteristic subjects likely to be of concern to the ministerial and professional counselor. The many aspects of working with individuals are investigated by means of case method and free discussion. (Prerequisite: 9 units of PSYC Psychology)

PSYC 3243 Small Group Theory

See SSCI 3243.

PSYC 4511 Psychology of Health

(See EDUC 5511)

PSYC 3101 Integration of Psychology and Theology I

A study of the contemporary efforts to develop a psychology consistent with Christian values, focusing on the value of integrative efforts to both the theory and practice of psychology and theology. Discussion includes matters of behavior, cognition, emotion, and motivation. (Prerequisite: PSYC 1103 General Psychology and upper level standing.)

PSYC 3103 Culture & Personality

See ANTH 3103.

PSYC 3113 Adolescent Psychology

Covering the period of life from puberty to emergence from the teens, this course emphasizes the physical, mental, emotional, social, and personality growth with special attention to guidance toward acceptable behavior and the prevention of delinquent behavior. (Prerequisite: PSYC 1103 General Psychology)

PSYC 3123 Principles and Practices to Enhance Self Esteem in Children and Adolescents

This course includes lecture and practicum components. The course covers the levels of moral and caring development, teaches some beginning counseling skills, and provides students with an introduction to service learning. Liberal Studies majors complete a 30-hour field time which involves working in an elementary or middle-school setting with a child as well as implementing service learning strategies. Students in Church Leadership majors will work with children or youth within a church-related context as well as implement service learning strategies. This course is valuable to anyone planning to work with children and adolescents. Prerequisite: General Psychology. Note: Meets 30 hours of the field experience hours required for Liberal Studies majors.

PSYC 3201 Integration of Psychology and Theology II

A study of the contemporary efforts to develop a psychology consistent with Christian values, focusing on the value of integrative efforts to both the theory and practice of psychology and theology. Discussion includes matters of behavior, cognition, emotion, and motivation. This course involves the writing of a senior thesis. (Prerequisite: PSYC 1103 General Psychology and upper level standing.)

PSYC 3203 Pastoral Psychology

This class addresses the practical issues arising in the context of counseling in the church or Christian setting. Specifically, Christian models of mental health and wholeness, counseling techniques, and uniquely Christian resources will be discussed, as well as clinical issues commonly presented to the pastoral counselor. Special attention will be given to the legal and ethical issues involved in the practice of pastoral psychology, particularly use of pastoral position and spiritual authority.

PSYC 4403 Psychology of Leadership

This course reviews the social and psychological principles of leadership. Students are provided opportunity to apply these leadership principles to real world leadership problems. The goal of the course is to develop students' leadership skills.

PSYC 4502 Educational Psychology

This course is designed to provide the candidate with information on research and theoristics related to the cognitive, affective, social and personal development of all students, including those from diverse ethnic, cultural, linguistic, and racial backgrounds. Emphasis is placed on the application of research to the establishment of a classroom environment which will produce optimum learning for all students.

PEDU Special Courses

Special courses are offered periodically. See page 122 of the catalog for descriptions of special courses.

PHIL—Philosophy

This course considers and evaluates major theories of ethics as a basis for students to develop a sound approach to ethical issues in life, personally, socially, and professionally.

PHIL Special Courses

Special courses are offered periodically. See page 122 of the catalog for descriptions of special courses.

PSYC—Psychology

An introductory course in psychology, study includes heredity, environment, personality, emotions, adjustment, physiology, perception, and the learning process.

PSYC 2103 Child Growth and Development

A study of life from conception to adolescence, with emphasis upon the theories and process of development and upon responsible adult control of relevant phases of nurture. The course will include concrete experiences in working with children. (Prerequisite: PSYC 1103 General Psychology)

PSYC 2213 Personality Theory

This course begins by reviewing the major components of personality theory development. Then the work of the major personality theorists is reviewed, evaluated, and systematized. (Prerequisite: PSYC 1103 General Psychology)

PSYC 2253 Residence Life Experience

The course is designed for the highly motivated individual who desires to work in the residence situation with students to develop a more socially healthy environment on the Bethany campus. It is largely a learn-by-doing experience directed by the Office of Campus Life. (May be repeated for credit. Prerequisite: Permission of Dean of Students.)

PSYC 2503 History and Systems of Psychology

This course centers on an analysis of antecedents of modern psychology and their relevance to major contemporary systematic positions. Emphasis is placed upon philosophy of science, associationism, structuralism, functionalism, behaviorism, gestalt, psychopathology, and recent psychological theories, including existentialism. (Prerequisite: PSYC 1103 General Psychology)

PEDU 1141 Introduction to Volleyball & Basketball

This is an introductory course designed to teach the history, fundamental skills, playing rules, and social impacts of volleyball and basketball.

PEDU 1201 Nutrition, Self-Esteem, and Exercise

This course explores the relationship between a sense of psychological well-being, self-acceptance, nutrition and aerobic exercise. The course consists of a strong aerobics component along with theoretical considerations of wellness and the effects of stress. Emphasis is placed upon systematic strategies for fitness. This course in combination with PEDU 1101 Introduction to Physical Fitness and Wellness, fulfills half of general education requirement. Team-taught course.

PEDU 1301 Varsity Athletics

This course is taken only by those students competing on an intercollegiate athletic team of Bethany College. This course can be taken only one semester per year and may be repeated for a maximum of 8.0 units, as long as normal academic progress is maintained. (Note: This course does not meet the General Education objectives.)

PEDU 1311 Sports Management

This course is designed to provide practical management experience working with the intercollegiate athletic teams of Bethany College. Students enrolled in this course will assist the coaching staff with team management. Students will be systematically introduced to the meaning of management in the conduct of athletics. This course can be taken only one semester per year and may be repeated for a maximum of 6.0 units, as long as normal academic progress is maintained. (Note: This course does not meet the General Education objectives.) (Prerequisite: consent of instructor.)

PEDU 1321 Athletic Trainer

This course is designed to provide supervised practical experience in Bethany's athletic training facility working with the College's intercollegiate athletic teams, including coverage of daily practice, and home and away events. Hands-on experiences will fulfill a portion of the 1500 hours of clinical experience required by the National Athletic Trainers Association (NATA). Students will learn proper taping and icing procedures, and with advance notice will learn to provide medical evaluations, emergency treatment and rehabilitation for injured athletes. In addition, students may assist in the management and supervision of the athletic training facility. This course can be taken only one semester per year and may be repeated for a maximum of 6.0 units, as long as normal academic progress is maintained. (Note: This course does not meet the General Education objectives.) (Prerequisite: consent of instructor.)

PEDU 2102 Introduction to Growth and Motor Development

This is an introductory course designed to give a foundation in growth and motor development, motor learning, biomechanics and kinesiology, and exercise physiology.

PSYC 3313 Testing & Measurement

This course purposes to give an overview of the use of psychological measurements and evaluations. It will cover both teacher-made and standardized tests, how to construct and administer them, the evaluation and utilization of their results, interpretation of test scores, and reporting of student growth. (Prerequisite: PSYC 1103 General Psychology)

PSYC 3323 Psychology of Adulthood and Aging

A study of the central concerns of adulthood and aging examined from a development perspective. Special attention is given to modes of interpersonal interaction and to how one's life view influences and is influenced by the aging process. (Prerequisite: PSYC 1103 General Psychology, and Child Growth and Development, or Adolescent Psychology, or permission of instructor.)

PSYC 3333 Statistics

See BUSI 3333.

PSYC 3433 Research Methods

This course is designed to acquaint the student with basic experimental procedures and designs, laboratory apparatus and the collection and treatment of experimental and correlational data. Several experiments and experimental reports utilizing appropriate statistical procedures are required of each student. (Prerequisite: PSYC 3333 Statistics) Lab fee required.

PSYC 4101 Integration of Psychology and Theology I

A study of the contemporary efforts to develop a psychology consistent with Christian values, focusing on the value of integrative efforts to both the theory and practice of psychology and theology. Discussion includes matters of behavior, cognition, emotion, and motivation. (Prerequisite: PSYC 1103 General Psychology and upper level standing.)

PSYC 4103 Abnormal Psychology

This course explores methods and characteristic subjects likely to be of concern to the ministerial and professional counselor. The many aspects of working with individuals are investigated by means of case method and free discussion. (Prerequisite: 9 units of PSYC Psychology)

PSYC 4113 Principles of Counseling

This course explores methods and characteristic subjects likely to be of concern to the ministerial and professional counselor. The many aspects of working with individuals are investigated by means of case method and free discussion. (Prerequisite: PSYC 1103 General Psychology)

PSYC 4403 Psychology of Leadership

This course reviews the social and psychological principles of leadership. Students are provided opportunity to apply these leadership principles to real world leadership problems. The goal of the course is to develop students' leadership skills.

PSYC 4502 Educational Psychology

This course is designed to provide the candidate with information on research and theoristics related to the cognitive, affective, social and personal development of all students, including those from diverse ethnic, cultural, linguistic, and racial backgrounds. Emphasis is placed on the application of research to the establishment of a classroom environment which will produce optimum learning for all students.

PSYC 4511 Psychology of Health

(See EDUC 5511)

SCIE 4103 Integrated Thematic Science	SSCI 1503 Sociology	SCI 4103 History of Political Thought
An introduction to the study of human behavior in social groups and the basic concepts used in sociology. Deals with social groups, cultural organization, race, and social institutions.	See HIST 4103	See HIST 4103
SSCI 2203 American Institutions	SSCI 2303 Human Geography	SSCI 4503 Urban Sociology
An introduction to the principles and problems of government in the United States, including study of the Constitution, the organization and functions of the federal government, public finance, and state and local government.	A regional treatment of human geography with emphasis on the relationship of human population to natural resources, economies, land tenure, settlement and adaptation. Consideration is given to urban geography.	The nature, causes and consequences of industrial urbanization with emphasis on social problems and urban planning in metropolitan complexes in the United States.
SSCI 2103 American Government	SSCI 2503 Social Problems	SSCI 3203 Theatre Arts
An introduction to the principles and problems of government in the United States, including study of the Constitution, the organization and functions of the federal government, public finance, and state and local government.	An application of sociological principles to the identification and analysis of selected social problems in contemporary American society including the problems of education, the family, crime and delinquency, poverty, minority groups, social and personal pathology, and the problems of aging and retirement.	A study in the analysis, adaptation, and group performance of literature appropriate to a variety of audiences (i.e., the church, the street, the theatre). Performances are done both in and out of class, with special attention given to off-campus, field performances.
TART 2503 Theatre Roots in the Church	TART 1103 Acting I	TART 2603 Readers Theater
A study of liturgical drama, mystery plays, passion plays, miracle, and morality plays. This course retraces the reemergence of theatre within the Church during the Medieval days.	A study of theatre activities such as sensory and emotional awareness, rhythm, movement, improvisation, and characterization as well as a study of theatre concepts, purposes, processes, and resources.	A study in the analysis, adaptation, and group performance of literature appropriate to a variety of audiences (i.e., the church, the street, the theatre). Performances are done both in and out of class, with special attention given to off-campus, field performances.
TART 3203 Directing II	TART 1203 Theatre Survey	TART 3203 Directing II
Intensive examination and application of the director's work with actors and the playscript. The idea of creative process, image making, and the exploration of space will be some of the main considerations. There will also be continued emphasis on text analysis and beat work, as it affects the motivations of both director and actor. (Prerequisites: TART 2203 Directing I and TART 3313 Text Analysis; or permission of the instructor.)	An overview of the origins and envelopment of theatre beginning with the ancient Greeks to the contemporary. This course emphasizes the identification and discussion of major shifts in theatrical style and conventions.	Intensive examination and application of the director's work with actors and the playscript. The idea of creative process, image making, and the exploration of space will be some of the main considerations. There will also be continued emphasis on text analysis and beat work, as it affects the motivations of both director and actor. (Prerequisites: TART 2203 Directing I and TART 3313 Text Analysis; or permission of the instructor.)
TART 3212 ACTS II	TART 2103 Acting II	TART 3212 ACTS II
The Theatre's touring company which addresses social issues through relevant artistic and contemporary drama. Audiences include both the secular and Christian communities. Students will be given opportunity to develop both as artist and as witness for Christ. (Audition only; prerequisite: TART 1103 Acting I.) (May be repeated for credit.)	Intermediate and advanced acting. This course focuses upon the student's developmental and specialization needs in acting; students should expect intensive scene work. (Prerequisites: TART 1103 Acting I, or permission of the instructor.)	The Theatre's touring company which addresses social issues through relevant artistic and contemporary drama. Audiences include both the secular and Christian communities. Students will be given opportunity to develop both as artist and as witness for Christ. (Audition only; prerequisite: TART 1103 Acting I.) (May be repeated for credit.)
TART 3313 Text Analysis	TART 2112 Play Production I, II	TART 3313 Text Analysis
	Rehearsal and performance of a full-length play or musical. By audition only.	Rehearsal and performance of a full-length play or musical. By audition only.
TART 3403 Oral Interpretation	TART 2203 Directing I	TART 3403 Oral Interpretation
Analysis and oral interpretation of varied types of prose and poetry, including Biblical literature.	Introduction to the directing process, including play analysis, selection of material, and rehearsal and performance of a final project.	Analysis and oral interpretation of varied types of prose and poetry, including Biblical literature.
TART 3603 Theory of Theatre	TART 2222 Stage Movement	TART 3603 Theory of Theatre
Extensive exposure to live and filmed drama and the means to form a critically sophisticated response to theatre. Focus is upon Aristotle's theory, theme, characterization, symbols, and staging. (Prerequisite: ENGL 1203/Introduction to Literature and upper division standing.)	This course is designed to facilitate actors in developing muscular control and strength, fluidity of movement, balance and coordination. Students may anticipate floor exercises, some ballet work and general warm-ups. This course should be taken in conjunction with the Fall and Spring productions. Students will participate in a recital demonstrating learned objectives for the course.	Extensive exposure to live and filmed drama and the means to form a critically sophisticated response to theatre. Focus is upon Aristotle's theory, theme, characterization, symbols, and staging. (Prerequisite: ENGL 1203/Introduction to Literature and upper division standing.)
TART 3953 Text Analysis For Performance	TART 2302 The Art of Storytelling	TART 3953 Text Analysis For Performance
This course is intended for students of drama who have some background in the study of dramatic literature. The course provides the guidelines and practice of script, character, and dramatic analysis for the play script. This course is structured to intricately assist students in their ability to skillfully develop text analysis.	Methods for various ages. Practical methods are used so that every student has opportunity to put theories into practice. Possible off-campus "field" audience opportunities.
